

The Bona DCS 70 is a powerful tool for completely dustfree sanding. Its two-step cyclonic separation and unique filter design effectively contains dust within the machine. It is highly portable and can be easily connected to your sanding machine, helping you keep your working environment clean and reducing your working time.

### Application

For dust-free sanding of all kinds of wooden and parquet floors

### Key Benefits

- 2-step cyclonic separation and unique filter
- Healthier working conditions – in compliance with new regulations
- Totally sealed system – unique seamless bag system, no dust can escape when changing dust bag
- Greater customer satisfaction because of sanding without dust and reduced odour
- Exclusive design from Bona – unique separation process
- Ergonomic – designed for easy use and transport
- Superb end-result after applying finish because no dust is left on the surface of the bare wood
- Made for professional use – robust, high quality machine for flooring contractors
